## Serie 910-Twin-De Dual workplace.

Design in accordance with DIN EN 527-1 consisting of centrally positioned tubular steel cross-pieces and welded brackets.

Substructure consisting of two pairs of uprights made from powder-coated metal with round and square cross-sections. Optionally available with closed side elements (side panels) between the uprights. Electrically-driven height-adjustment with two-stage telescoping uprights, collision protection and optionally with display, memory and child safety protection.

Table tops made from melamine-resin, veneer or linoleum-coated chipboard, a melamine resin-coated or veneer MDF top or an HPL solid top. The edges may be straight or rounded. With sliding top as standard.

Electrical connections (optional) by means of a folding metal cable tray or a textile cable tray that can be folded down on both sides and a linkable cable trough for the joint cabling of both desks. It is possible to choose between a flexible textile cable hose and a round or rectangular cable chain.

Cable outlet through a maximum of three metal outlets (left, centre, right) or an E-box positioned on the left or right for network or data connections for each workplace.

The following material groups are available to choose from: Frame made of steel tube: M2; Top made of chipboard, MDF, HPL: L6; Top made of linoleum: L8; Top veneered: F1.
