

Shift+ Physical Distancing Layouts

Agile Furniture Solutions by VS

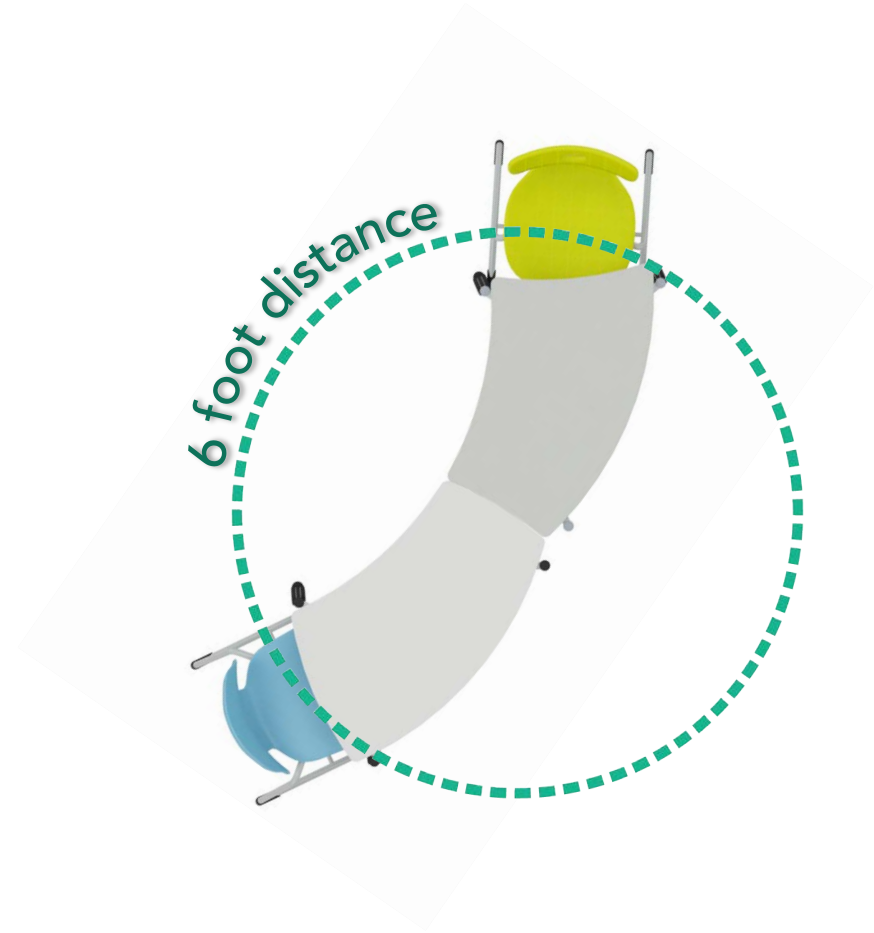

DISTANCING DURING COVID-19

Schools teaching in-person during COVID-19 have been able to easily adapt their spaces, with VS America's agile furniture, in order to follow safety precautions. Creating a physically distant classroom environment happens quickly by stacking unneeded tables and chairs out of the way. And, mobile, stackable furniture that fits through doorways ensures schools can quickly expand into hallways, foyers, and gyms as needed.

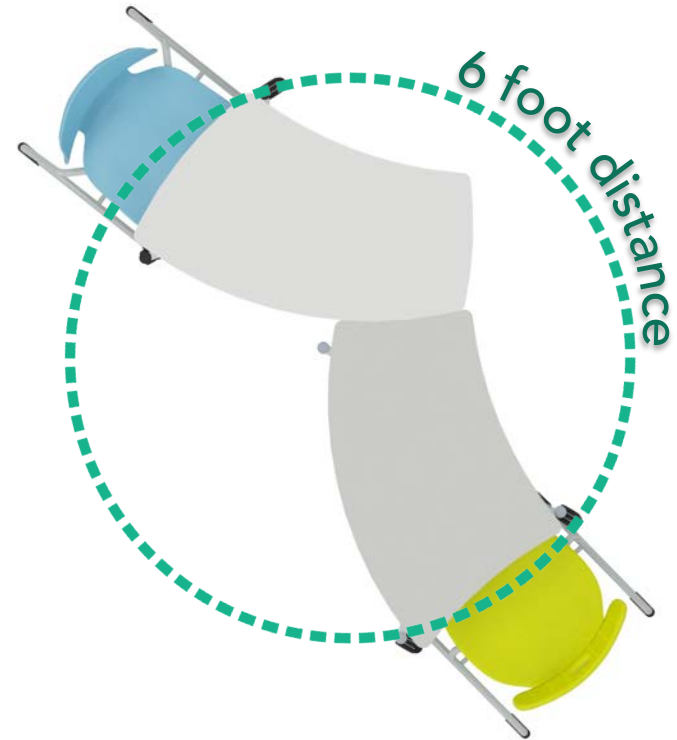

“During the COVID-19 pandemic it is critical to practice physical distancing, but we also need to remember to still support collaboration and communication. Adding a mask eliminates the mouth from view, but there are dozens of other physical cues sent and received to support communication between students. This is precisely why we need to avoid setting up classrooms where students are only seeing the back of another's head. Shift+ tables provide the agility educators need to easily adjust educational environments so students can still utilize their sensory systems to communicate more deeply and collaborate with one another, while maintaining physical distancing.”

– David A. Stubbs II, Creator of Shift+
